Delight your residents

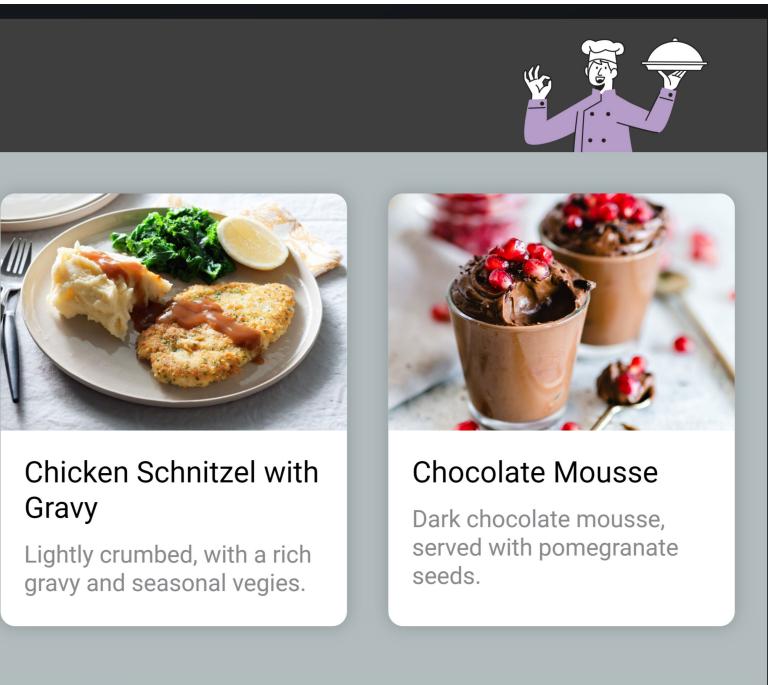

Resident Dietary Profiles

Extensive resident profiles capture every aspect of eating needs and preferences, from allergies and IDDSI textures, to dislikes, special utensils, and more.

Orders

Go beyond the basics and capture more about orders, from custom notes to portion sizes. Advanced features like “regular order items” give valuable time back to your teams.

A TV screen displaying a menu board. At the top is a cartoon chef holding a tray. Below are two meal options: "Chicken Schnitzel with Gravy" (a plate of schnitzel, mashed potatoes, and greens) and "Chocolate Mousse" (two cups of chocolate mousse topped with pomegranate seeds). Each option has a brief description below it.

Chicken Schnitzel with Gravy
Lightly crumbed, with a rich gravy and seasonal veggies.

Chocolate Mousse
Dark chocolate mousse, served with pomegranate seeds.

Smart Safety Warnings

Add a crucial safety net around meal orders, using the smart safety warnings on allergies, food textures, and medical conditions.

TV Menu Boards

Build excitement around your menu using fully automated and beautifully presented TV menu boards which highlight upcoming meal services.

Feedback

Collect feedback from residents about their meals and their dining experience to promote continuous improvement and ensure resident satisfaction.

Empower your teams

Menu Planner

Planning weekly and seasonal menus has never been easier with our powerful menu copying feature.

Kitchen Reports

The prep report helps your kitchen staff focus with the exact information they need using summaries, special notes, and intelligent filters.

Docketing

Print restaurant-style dockets with full details of residents' orders and dietary restrictions to build confidence that you're getting every plate right, every time.

Alerts

Keep your kitchen staff informed using automated alerts whenever a resident's dietary profile changes, or a new resident is welcomed.

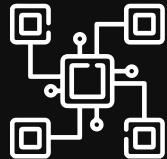

The Embrayse app interface on a tablet shows a list of meal items on the left and a detailed nutrition facts overlay on the right. The nutrition facts table includes columns for Name, Texture, and various nutritional values like Energy, Protein, and Sodium. On the smartphone, a specific recipe for 'Chicken Schnitzel with Gravy' is displayed, showing servings, ingredients, and instructions.

Recipes and Nutrition

Improve meal quality with our recipe builder and comprehensive ingredient database and review per-serving nutrition facts on the fly.

Excel beyond compliance

Integration

We provide seamless integration with your clinical systems to minimise duplication and the chance of mistakes.

Reporting

We provide you with key reports to keep you on top of your compliance needs and make informed business improvement decisions.

Security

We build everything with security in mind. With the use of Single Sign-On (SSO), role-based access, Australian-based data servers, and IRAP-certified services; we ensure that you and your residents' data stay secure.

Business Continuity

Real-time database backups and automatically generated printable PDFs of orders ensure that your kitchen is uninterrupted even when technology lets you down.

Easy To Learn

Embrayse is specifically designed to be simple to use by staff with little technology background. New users can learn and use the app effectively with little to no training.

About us

We are your partners

We are experienced consultants by background, with more than 40 years of combined experience in both the aged care sector and software delivery. We seek to work in close partnership with you to understand how you work and what challenges you face, rather than just offering a product. We then use what we learn to enhance the software to better serve your needs.

We deliver with agility

Unlike many vendors where you communicate with a sales rep or account manager, we give you direct access to our product team. We are an agile company with the ability to iterate quickly and ship new features in a matter of weeks, not months.

We don't compromise on user experience

Embrayse is the only catering app that is designed with the resident experience as its core value. Creating intuitive user experience and interfaces is one of our core capabilities. We ensure that our software will always be easy for your teams and residents to pick up and run with, to minimise uptake costs and keep your team smiling.
